

Naqla

Branch Workflow !' Merge to main

An-Najah National University — Graduation Project

Team: Mohammed Nofal · Ameer Abu Shams

1. Branch model

Each student has one personal branch. Work happens on that branch, then merges into main with a Pull Request.

```
main
% % %   mohammed   (Mohammed Nofal)
% % %   ameer      (Ameer Abu Shams)
```

- Do not commit directly to main.
- Always pull main before continuing your branch.

2. Upload order

- 01 Mohammed / mohammed / 01-monorepo-scaffold !' PR !' main
- 02 Mohammed / mohammed / 02-web-student-core !' PR !' main
- 03 Ameer / ameer / 03-role-dashboards !' PR !' main
- 04 Mohammed / mohammed / 04-career-tools !' PR !' main
- 05 Ameer / ameer / 05-talent-market !' PR !' main
- 06 Mohammed / mohammed / 06-mobile-workflows !' PR !' main
- 07 Ameer / ameer / 07-data-docs !' PR !' main

3. Run before every push

```
npm install
cd apps/web
cp .env.example .env.local
npm run dev
Open http://localhost:3000 — demo: student@naqlah.ps / Naqlah@2025
```

Every stage folder is a full runnable project.

4. Steps for one stage

- 1. Update main:

```
git checkout main
git pull origin main
```
- 2. Use your branch:

```
git checkout -b mohammed
# later: git checkout mohammed && git merge main
```
- 3. Copy the stage folder contents into the repo root.
- 4. Verify the app runs (section 3).
- 5. Commit and push:

```
git add .
git commit -m "<commit message>"
git push -u origin mohammed
```
- 6. GitHub: Pull Request mohammed !' main !' Merge.
- 7. Teammate pulls main before his next stage.

5. Commit messages

- 1) chore: scaffold Naqla monorepo and landing
- 2) feat(web): student core flows — auth, feed, jobs
- 3) feat(web): multi-role dashboards and modules
- 4) feat: career tools and matching algorithms
- 5) feat: talent pools and job market analysis
- 6) feat(mobile): Expo app and platform workflows
- 7) chore: supabase schema, seed, and documentation

6. Do not upload

- .env.local / secrets

- node_modules/
- .next/

7. Package

```
release/naqla/           # runnable working copy
release/stages/01..07/   # runnable stage snapshots
release/ORDER.txt
release/Naqlah-Handoff-Guide.pdf
```
